

NAVY DIRIGIBLE OFF FOR CUBA AFTER LONG FLIGHT

ARMY AVIATION GIVEN SUPPORT IN MONEY BILL

Long Fight for Adequate
Air Force Appears
To Be Won

MILLIONS GIVEN FOR NEW PLANES

Congress Agrees upon Big
Air Force to Protect
This Country

Washington, Feb. 28.—The long fight for an adequate American air force appeared won today with congress appropriating \$26,808,000 for army aviation in the coming fiscal year.

This item featured the war department appropriation bill, totaling \$400,000,000, which went to congress today to iron out differences between the house and senate. Both branches, however, were agreed upon the necessity for developing a great air force to protect the United States from its potential enemies in the future.

The appropriation of millions of dollars for new airplanes and for the training of aviators was in sharp contrast to the meager fund given this branch of the national defense in previous years. The change represented a victory for Colonel "Billy" Mitchell, former "army pet" of the army air service, who dared a court-martial two years ago to arouse the American people to the need for a greater air service.

Senate Goes Further

The house treated army aviation with extreme liberality, but the senate went a little further. In addition to approving a \$24,000,000 house appropriation, the senate set aside two funds, totaling \$2,178,000, already appropriated, to be used for army aviation. Both branches also authorized the chief of the air corps to enter contracts for \$5,000,000 worth of new airplanes for delivery in 1930. This made a grand total of nearly \$32,000,000 to be spent for aviation.

The new liberality can best be illustrated by the fact that a few years ago the appropriation for new airplanes was only \$45,000. In the new bill the house appropriated \$11,257,445 to pay for new aircraft, while the senate approved for new and old aircraft \$1,169,000 for new bombardment planes.

Both house and senate likewise agreed upon a \$2,200,000 fund for "experimental and research work with airplanes or lighter-than-air craft and their equipment."

The bill probably will be enacted finally by Wednesday or Thursday and sent to the White House for the president's signature.

ATTEMPT TO ROB ECKSTEIN STORE

Hole Bored In Rear Door
Of Clothing Store Is
Discovered Today

Police today faced a second robbery mystery.

An attempt was made to gain entrance in the Eckstein Co. store sometime during Monday night.

Employees of the store this morning found a hole in the rear door, as much as a foot in diameter, and two inches in diameter. There is metal casing on the inside of the door and this stopped the tool.

It is believed that the burglars may have been frightened away before any other attempt to enter the store could be made.

Police are still without a definite clue to the identity of the safe blowers who took \$441 from the vault in the board of education office at Salem High school building Saturday night.

Sale experts have been retained to repair the vault door, the mechanism of which was broken by a heavy charge of some explosive, probably nitroglycerine, which was inserted in a small, bored hole in the vault door.

Hiddleston Receives Fruit From Florida

Mayor Phil Hiddleston today received a box of fruit from Florida, the gift of W. H. Mullins, "wintering" in the sunshine state.

The mayor dispatched the following telegram in thanking Mr. Mullins:

"Many thanks. Very pleased to note you are still able to shake down the old citrus tree. Am sincerely trying to hold down job of head man of Salem during your absence. Ready to turn over reins to you when you return."

"I am fed up on this head man stuff and realize that it requires years and wisdom to get away with it. Hurry back, Salem wants and needs you."

Government Scientists Turn Thumbs Down On Mystery "Fuelless Motor" Invention

That Such a Motor or Generator can be used to Drive
Airplanes is Regarded As Extremely Doubtful
By Earth Inductor Compass Inventor

BY ROBT. S. THORNBURGH
(Copyright, 1928, by I. N. S.)
Washington, Feb. 28.—Terrestrial magnetism may be harnessed to create energy that will turn wheels and make telegraph instruments tick, a group of government scientists at the Bureau of Standards agreed today, but they turned thumbs down on the mysterious and much discussed "fuelless motor" invented by Lester J. Hendershot, of Pittsburgh.

That such a motor or generator can be used to drive airplanes was regarded as extremely doubtful by Dr. Paul R. Heyl, inventor of the earth inductor compass that guided Lindbergh to France, and Dr. H. D. Hubbard, who has visualized such apparent impossibilities as a camera which focuses automatically as does the human eye, and interplanetary transportation.

Can't Understand It
"You can't get something for nothing," declared Dr. Heyl, whose inductor compass operates on a principle somewhat similar to that of the Hendershot generator.

"To operate an airplane requires at least 400 horsepower. A device that would develop that power from earth currents would be too heavy and cumbersome for aircraft."

Hendershot's generator operates a motor or lights a light, the whole story of the invention has not been told. From the newspaper dispatches I am at a loss to understand what kind of a machine it is. I can conceive of no practical device that would develop sufficient power from earth magnetism to run an airplane.

Looks Impossible
The earth inductor compass is based on the principle that the voltage of a direct current dynamo

is charged by shifting the angle between the magnetic field and the brushes, which collect the current from a revolving armature.

The armature is driven by a wind-wheel, whose motion is dependent upon the movement of the air plane.

While there are few "impossibles" in Dr. Hubbard's vocabulary, he said that a "fuelless motor" that would drive an airplane "looks impossible."

"It's a fact that here in the bureau, the light of the north star," (Continued on Page 4)

HEROES OF THRILLING SEA RESCUE

After being swept from the deck of the tender Corona at Bermuda, Mrs. Luther Z. Rosser was rescued by the daring work of R. C. Higgins and Captain McQuinn.

The Corona was bringing a load of tourists from the shore, to the Anchor Line California, when a huge wave carried Mrs. Rosser off the deck. R. C. Higgins immediately dove overboard and reached the woman's side while Captain McQuinn cleverly manipulated the Corona to find them in the growing darkness.

At the present time about 138,000 men are on strike.

The committee collected about 200 pages of testimony on its trip. Instead of a written report, the subcommittee will relate orally to the full committee its experiences in the nine camps. A meeting was called for Thursday. The general investigation by the full committee probably will get under way next week.

In the committee's opinion some legislative remedy must be found to relieve the present strike conditions or unrest will spread to other industries, including the railroads, and affect thousands of persons. No program has been mapped out but a bill calling for federal supervision of the coal industry will be presented by one or two of the committee members, Senator Wheeler (D) of Montana already has introduced a bill to nationalize the mines.

NEW STRIKE OF 350,000 MINERS IS THREATENED

Mine Workers Officials
Make Report As Senate Probe Ends

SOME LEGISLATIVE
REMEDY IS URGED

Activities of Communists
Arouses Gooding, One
Of Investigators

Washington, Feb. 28.—A new strike of 350,000 union miners in 12 states is threatened on April 1, United Mine Workers officials reported today to the special senate coal committee.

After nearly a week's investigation in Pennsylvania fields, the committee, headed by Senator Gooding (R) of Idaho, returned to Washington today to prepare a report for the interstate commerce committee.

States which will be affected by the threatened walk-out include Illinois, Indiana, Iowa, Oklahoma, Missouri, Kansas, Wyoming, Washington, Montana, Texas, Ohio and northern West Virginia. In these sections some union operations have been working under temporary wage agreements. All efforts thus far to negotiate a settlement have failed, union officials declared.

Oral Report

At the present time about 138,000 men are on strike.

The committee collected about 200 pages of testimony on its trip. Instead of a written report, the subcommittee will relate orally to the full committee its experiences in the nine camps. CHICAGO WILL HAVE Day of Prayer

Chicago, Feb. 28.—Bold, bad Chicago is to have a day of general prayer, on which divine assistance will be asked to lead the city out of the "wilderness of crime."

Wednesday, March 7, has been set aside as the day. Plans for general observance by citizens of all races and creeds are being worked out today by the Union Ministers' association, originator of the idea.

Mayor Phil Hiddleston today reserved decision in the case of Leonard J. Barber, Yellow Cab Co. proprietor, held for failing to deposit certificate of liability insurance with the city solicitor.

Several days was consumed in taking testimony in this case, and the trial was concluded late Monday afternoon. The mayor stated that there are so many ramifications to this case that he will hand down a written opinion in a day or so.

It is regarded probable that the case will be carried to the higher courts, whichever side is favored by the verdict.

Barber was charged by Atty. H. R. Hickling with an offense under the city tax ordinance. This is the outgrowth of an accident Jan. 1 when a machine Barber was driving struck William Siebers on Main St. Siebers later died. Atty. K. L. Courn represented Barber.

Mayor Hiddleston today ordered all of the licenses of drivers for Barber temporarily suspended and prohibited Barber from operating his taxis until Barber secures a new liability insurance policy.

The taxi man's former policy expired Monday, and until he secures a new policy his cabs cannot operate.

At the same time the mayor revoked for an indefinite period the license of Robert Oesch, one of Barber's drivers, for cause. The mayor says that police have reported Oesch has been driving too recklessly and violating the city ordinances.

This is the first time a taxi driver's license has been taken away here by the mayor, under the provisions of the tax regulatory ordinance.

Name George Emeny Assistant Manager Of Cornell Varsity

George Emeny, son of Mr. and Mrs. F. J. Emeny, Highland ave., has been named assistant manager of the Cornell varsity football team for next season.

Emeny, a sophomore at Cornell, won out in competition with a score of other applicants for the position. This places him in line for the management of the team in his senior year.

Jury Selected To Hear Murder Case

New Lexington, Feb. 28.—Ten men and two women make up the jury which is to try five persons, including two women, jointly charged with complicity in the Grant Weakley murder here last summer. The jury was completed at noon today.

Those on trial are Imogene Kellogg, George Zens, of Detroit, Beaumont Sowers, of Cincinnati and Mr. and Mrs. James Sowers of Newark. They are alleged to have concealed weapons in a dentist's office, which were used by two convicts during an attempted escape last summer.

Relief Total Jumps

Columbus, Feb. 28.—Cash contributions received by the Ohio National Guard for relief work among destitute children in Ohio's coal mining regions were boosted today to \$29,409 when a check for \$1,600 was received at the office of Adjt. Gen. Frank Henderson from the 147th infantry, O. N. G., club at Cincinnati.

Inefficiency Of Police Blamed For Country's Notorious Crime Record, Is Report

New York, Feb. 28.—Inefficiency of the police, due to the "lack of average intelligence," is blamed for this country's "notorious crime record," in a report of the National Crime Commission made today.

The report was made by the committee on inefficiency of police and courts, Frank O. Lowden, former governor of Illinois, is chairman of the committee.

The report admits that courts and parole boards also have been at fault, "but," it adds, "the most startling thing is the small number of criminals caught by the police."

Crime, the report said, would seem to be the safest business in which one could engage. The luckless individual who is arrested, it was said, must attribute his misfortune to an act of God, as he would in case of disastrous storm, shipwreck, or earthquake.

Only 2 per cent of thieves are apprehended in Cleveland and St. Louis. Buffalo arrests men only in 3 per cent of its robberies. New York, in 1925, made arrests in 20 per cent of its felonies.

Further, it was pointed out, the courts convict only a portion of the men brought to trial. The trouble with the police, the committee found, is lack of intelligence. A little more than 25 per cent of Cleveland's men were of the moron grade of feeble-mindedness. Only 33 per cent of the Cleveland force was of average intelligence, according to army intelligence tests.

The detective squad in Cleveland showed even more amazing results, according to the report. Not one man was of first rate intelligence.

SHIP PERFORMS WELL IN FLIGHT TO CANAL ZONE

Practical Demonstration
Of Feasibility of Use
For Long Trips

CROWDS CHEER AS
BLIMP TAKES OFF

High Praise Is Accorded
Commander Rosendahl
And His Crew

Culcn, Panama Canal Zone, Feb. 28.—After a stay of 12 hours in the Panama canal zone, the United States navy dirigible Los Angeles left French field at 10:20 a. m. to head for Cuba.

A big crowd which had been gathered at the flying field since shortly after dawn cheered as the great aircraft was untied from the special mooring mast and moved away from France field under her own power.

The Los Angeles flew westward over the Panama canal, circling over the Panama before heading for Cuba.

Both the arrival and departure at France field were carried out without a hitch.

A large squad of sailors was pressed into service at the flying field to aid the ordinary ground crew.

After heading westward towards Gatun the Los Angeles took a southeasterly course.

Panama canal guards and employees cheered as the big ship passed overhead.

Bahoa, Canal Zone, Feb. 28.—The huge U. S. navy dirigible Los Angeles presented a magnificent sight at France flying field here today, perched at the top of a mast erected especially for her coming.

The dirigible was moored safely at 10:25 last night upon the completion of her longest non-stop flight since she crossed the ocean from Germany.

The ship left her hangar at Lakeshurst, N. J., at 6:55 o'clock Sunday morning. She made the 2,200 mile flight in 39 hours and 30 minutes, averaging slightly less than 60 miles an hour.

Weather conditions were favorable for the expected departure today of the ship for Guantanamo bay, where it will refuel from the aircraft carrier Patoka.

Starts For Patoka
Commander Rosendahl said that he expected the dirigible would start for the Patoka early today. He said maneuvers with the mother ship might be attempted.

The Los Angeles was sighted over Colon at 9:30 p. m. She made her way majestically towards the flying field, her silver-shined sides gleamed brightly as she entered the flood of light directed skyward by (Continued on Page 4)

NOTHING BUT THE TRUTH

Are we developing a race of liars? In recent days it has been startlingly brought to public attention that the courts are literally cluttered up with perjurers, and despite drastic penalties for liars on the witness stand, judges find it increasingly difficult to stem the practice of deceit.

Judges of the Common Pleas courts in Cleveland, have united to combat the prevalence of lying among witnesses. They have gone to the grand jury for indictments. The Cuyahoga county prosecutor has named an assistant to proceed vigorously against the liars.

Justice William Black of the supreme court in New York, is trying to make perjury so dangerous a practice that its general use will lose its lure and the courts of the Empire state will be made safer for the litigants honestly trying to settle a grievance by process of law.

It is the truth that lying has suddenly developed into a subtle, yet sinister attack at the foundation of American jurisprudence, then it is high time something be done about it. Judges have the prerogative of course, of clapping a liar in jail for contempt of court, but that penalty is not severe enough, it seems. The penalty for perjury is sufficient, if the law is rigidly enforced.

Lawyers and judges throughout the country disagree as to the proper procedure in elimination of this evil. Yet the belief is unanimous among them that concerted action by those connected with the civil and criminal investigations and trials will be necessary.

It has developed that juries in perjury cases, here and elsewhere in Ohio, and in other places throughout the country, are prone to accept a witness' declaration that he lied unintentionally, or because of a feeling of loyalty for relatives or friends. Thus they are indisposed to visit heavy penalties upon the perjurer.

There is another side to the question. Some students say the courts have become so accustomed to perjury that little attention is paid to it. If this be the truth, then it is high time the machinery of the courts is set in motion and a hall called Judging by the Common Pleas judge's move in Cuyahoga county, and Justice Black's action in New York, the courts are awakened at last to the seriousness of the situation.

A judge may sometimes frighten a lying witness into telling the truth. Yet it is impossible for the bench alone to wage a winning fight. The fight against perjury should begin with the arresting officer in all cases. It must be furthered by co-operation among reputable members of the bar to ostracize lawyers who make use of perjury to win cases.

Perjury is not a new practice. It has been in use for centuries. And only through earnest and energetic campaigns by officers of the courts can it be eradicated, or even materially lessened.

What Others Say

SOBER SECOND THOUGHT

Signs are apparent in Europe that the snap judgment of certain newspapers over there to the effect that our Nicaraguan arbitration is a piece of "American imperialism" is yielding to a knowledge of the facts. This view, indeed, could not last, if any pains at all were taken to obtain precise information concerning the matter. An important article in the Paris Temps of Jan. 31 is an indication of the change. Le Temps is not a journal whose views on American affairs are governed by any partiality for our country. It has been severe in its comments on the debt question. It is nevertheless able to inform itself in matters of international news of which subject it makes a specialty. It is interesting to read the Temps' article in question, which is entitled "The Imperialism of the United States," and from which the translate the following passages:

"The natural expansion of the United States does not lead us, as we presently it does too many minds, to denounce American imperialism. At this moment, too many are forget-

ting that the troops of the United States which are acting in Nicaragua, for instance, are there because they are called there by the contending parties, unanimously desiring that the ballot boxes shall be confided to an impartial arbitration. The belated resistance of one man is what keeps up the present hostilities. To maintain the right of peoples to govern themselves does not by any means imply the "right" of easy assassination."

"It is only by an absolute absurd kind of phariseism that any one can pretend to forbid the major powers from intervening in the affairs of those who are incapable of maintaining any sort of moral order among themselves. Such a pretension, which in certain circles has been made a sort of act of Democratic faith, would merely result in permitting the collective accomplishment of crimes that are severely punished when committed by individuals. The day will come when the universal conscience will consider civil wars as equally abominable with international wars. Then only will peace reign in the world. For the present, those who admit the warfare of classes and factions, with their result in wholesale murders, stupidly affect to blame nations that seek to impose some sort of respect for law on barbarous peoples. Such a view as that can not last long."

Our own agitators who want to know "what the marines are doing in Nicaragua" might do well to consider the sources of information which are here shown to be accessible to French students of the subject.—Boston Transcript.

HIGH COSTS AT PARKS

An interesting plan for reducing the high cost of visiting the various national parks was approved at a meeting of the responsible officials of such parks held at Los Angeles.

The cost of seeing this part of America first was almost as great as seeing Europe up to about ten years ago. The expense of transportation to such a park as the Yellowstone was high and to tour it with the horse-drawn carry-alls on arriving took five or six days at a heavy per diem and scant consideration was given on the roads and elsewhere to the "sangers" who came in their own wagons with camping outfit. The admission of motor vehicles in 1916 enabled much more to be seen in a less time and if the cost for visitors stopping at the permanent camps, instead of the hotels, was somewhat reduced, it was still not inconsiderable.

"Facilities for every pocketbook," is the motto guiding the park officials in planning the new policy. A five-year construction program must be completed before the aim is fully attained, but the poor man, is to be welcomed to the parks and made comfortable and he is just the man who ought to visit the parks. The new policy fits well into the automobile age. Students, heads of families in limited circumstances, others with more vacation time than money can make their way to the park in their flivvers and view the wonders unhurriedly and without financial strain. Best of all, perhaps, the children need not be left behind as they so often have been when they could bring their per capita costs up to an embarrassing figure.

And, assuming a scale of prices proportioned to lean purses, where else can children or adults obtain so much of instruction and enjoyment for so little money?—St. Louis Globe-Democrat.

Twenty Years Ago

(Issue of Feb. 28, 1908)

L. A. Callahan, this city, has received notice of his appointment on the committee of fraternal courts in the northern Masonic jurisdiction of Ohio.

Lisbon—Comparatively few marriage licenses were taken out in previous court this month and it looks like February will be a record breaker for few licenses issued.

The boards of safety service and health have now for the first time in the history quarters which are for their own use. A room has been provided in City hall exclusively for their use.

Work has been begun on East Liverpool's new postoffice building. The population of Alliance is 14,668 as shown by official census just compiled.

Ross Painter, formerly of this city, who has been employed in New York city, arrived here Friday for a visit. From here he goes to Iowa to spend the summer with relatives and from there will go to San Francisco to work.

Columbus—Senator Crist's bill reducing the age required to get a school teacher's certificate from 18 to 17 years, was introduced in the senate yesterday.

Authorities of Mt. Union college have ordered basketball and football players transferred from their quarters in Miller's hall to private houses for alleged spooning with younger girl students.

Mrs. W. L. Mercer was surprised Thursday evening at her home on Broadway by a company of her friends in honor of her birthday anniversary.

Miss Mabel Beeson entertained a number of friends on Thursday evening in honor of the birthday anniversary of her sister, Miss Ella Beeson.

W. C. Davidson of East Liverpool is a candidate for the nomination of sheriff.

Tomorrow's HOROSCOPE

By Genevieve Kemble

WEDNESDAY, FEBRUARY 29.

The world is mathematical and has no casualty in all its east and flowing curve. —Emerson.

According to the sidereal operations for this day things should move at a lively pace, not in every instance on constructive lines. There is foreseen action in new directions and in all that pertains to writings and publishing or promotion but in public affairs, with inventions and those forces of higher service, a disintegrating influence may be felt. Be careful in travel and change.

Those whose birthday is any look for a lively year, with new undertakings, promotion and publishing, as well as fresh contacts, flourishing but travel, change and all angles of invention and manipulating higher forces may suffer. A child born on this day should be versatile, active and generally clever, but may be restless and unsettled to its detriment. Let and diplomacy should be its key.

Notable Nativity: Elizabeth McCracken, editor and author.

Congenital Cataract Can Be Overcome

By Royal S. Copeland, M. D.

A letter comes from a worried mother asking about "congenital cataract." She wants to know its cause and what to do about it.

The popular idea is that cataract is a "skin over the eye," a film of some sort that shuts out sight. As a matter of fact it is not on the eye—it is in the eye.

Back of the colored part of the eye, behind the pupil is a structure called the "crystalline lens." In health, the lens is as clear and transparent as a well polished spectacle lens. It is not visible through the pupil; it is as readily seen through as a piece of plate glass.

If the "crystalline lens" loses its transparency if it becomes milky and cloudy, then there is a condition which we call cataract. Lack of clearness of the lens, no matter what its cause may be, is cataract.

The ordinary form of cataract is called "senile cataract." It is so called because it comes in advanced life and is one of the symptoms of old age.

But once in a great while a baby is born with cataract in one or both eyes. This is congenital cataract. Why does it come to afflict a tiny baby?

Before the infant is born, while it is being carried close to its mother's heart it is absolutely dependent on its mother for nourishment and growth. Unless her health is good and all her functions are perfect, the unborn babe is in danger.

If for some reason there is ill health five or six months before the baby is born, one of the possible consequences is to have the nourishment of the tiny eye interfered with and haziness of the lens in consequence. Then the baby is born with cataract.

The eye is a remarkable structure. It is delicately and wonderfully made. The chief blood supply of the interior of the eye comes from a big artery which perforates the back of the eyeball and spreads out the interior surface of the eye.

In the very early stages of the development of the infant, a branch of this artery stretches across the space in the back part of the eyeball. It is like a strand of cable and is called the "hyaloid artery."

It is the function of the hyaloid artery to supply nourishment and building material for what is to be the crystalline lens. So rapid and perfect is the development that a few months before the baby's birth, the eye and crystalline lens are com-

plete. Then the hyaloid artery dries up and disappears.

Unfortunately, the bad health of the mother or some accidental thing may interfere with this activity of the hyaloid artery. In consequence the lens may be imperfect or scarred. Then we have congenital cataract, and the baby is born blind or partially blind.

What can be done about it? The eye can be "needled." A fine needle is thrust into the eyeball, the baby being anesthetized. The simple operation removes the fluid of the eye to enter the lens substance to dissolve and absorb. After two or three such treatments the opacity is gone and there is nothing to prevent sight.

When the child grows older glasses must be worn to do what the crystalline lens would do if it were present and normal. Focusing of the objects is needed, of course, and if the eye can't do this, glasses will be required.

Congenital cataract is a misfortune, but, as you see, its effects can be overcome. Many happy persons have gone through life with no greater affliction than the need of glasses, in spite of the fact that they were born with cataract.

Answers to Health Queries
R. J. W. Q.—What do you advise for gaining weight?
A.—What causes cold hands and feet all the time?

A.—Eat plenty of good, nourishing food, including milk, cream, eggs, fresh vegetables and fruits. Exercise deep breathing. Sleep as many hours as possible in a well-ventilated room. Avoid worry and faulty elimination. Take a good tonic, such as cod liver oil.

Q.—This is usually due to poor circulation. Build up your general health and your circulation should improve.

SPUD ADOPTING IDAHO TACTICS IN MARKETING

West and East Engaging in Potato Supremacy Contest

Potatoes are being marketed in the state of Idaho. The "table potatoes" are grown in the state of Idaho. The west and east are engaged in a potato supremacy contest. Idaho began to market its potatoes in the state of Idaho. The west and east are engaged in a potato supremacy contest. Idaho began to market its potatoes in the state of Idaho.

Adopting Idaho Plan. Not content with improving and perfecting his method of production, Mr. Hoyt adopted the progressive Idaho method of marketing. Table stock is sorted into two grades, medium and large size. The medium size spuds are packed in paste-board cartons. Each carton contains a peck. The large spuds go into wooden boxes holding a bushel.

A grading machine, motor driven, moves the potatoes along a conveyor belt as fast as they are carried in. The potatoes are graded from the bin into the grading machine. The first part of the process is automatic; the meshes in the carrier being graduated in size so as to grade out all under 1 1/2 inches in diameter. The undersize are taken to the starch factory.

The sorting continues along a level canvas. As the potatoes pass along the moving belt, expert sorters pick out all the tubers whose shape and freedom from defects make them suitable for packing. The remainder go into sacks at the end of the belt.

Send Recipes Along. From the grading room, the spuds go to a packing room. There they are spread out on tables and again inspected for defects, wiped dry and packed in the cartons and boxes.

Mr. Hoyt is already shipping two carloads a week and other potato growers are following and developing his system.

In the boxes and cartons is placed a booklet entitled "Twenty Tests" to Cook Maine Potatoes daily for Health.

COURT NEWS

SUIT TO OUST JUSTICE IS ON TRIAL TODAY

After Judge W. P. Vaughn of Me. Circuit, presiding in No. 2 court, overruled a motion filed by Atty. W. H. Spence of London to dismiss the case of the State of Ohio against the City of London, the trial is on today.

The summary was not given. Sheriff George Woods said that the case was closed until Tuesday morning.

The action against Calvin has been pending for over a year. The case is now on trial.

All of the witnesses subpoenaed are from St. Clair township. The jury is from the vicinity of St. Clair.

Calvin is a resident of St. Clair. The case is now on trial.

The first show should be rather simple and unpretentious, and each succeeding show should be a development of and an improvement upon the previous ones.

The nature of the first show will be determined by local conditions. In some communities dahlias will be the most prominent flowers in others, roses, but usually an early fall show will be the most certain to succeed and the easiest to stage.

The object of all amateur shows should be to develop a local interest in flowers among the mass of people and to encourage as large a number as possible to compete in the show.

Detailed instructions for the holding of local shows are included in an outline which can be obtained by interested persons or committees through the Extension Service of the Ohio State university.

Stentonville. — John Ponke, 60, veteran photographer and musician was fatally injured recently when he fell from a third floor window in his studio to the street 50 feet below. Ponke was standing on the window ledge washing the glass when he slipped and dropped to the street.

Stanhope, Turkey. — With most of the old Turkey already gone up in smoke, war is now being waged on the very smoke that made her famous. A group of Stanhope doctors and reformers are organizing a "velvet crescent society" to combat tobacco.

Havana. — Passenger and mail service by airplane was inaugurated recently between Santiago, Cuba, Santo Domingo, Porto Rico, and Haiti, when the airplane "Santa Maria" left Santiago.

ment of this service over a 900-mile route touching three republics and Porto Rico was termed a direct result of Col. Charles A. Lindbergh's recent Caribbean flight.

COMING STARS of the MOVIES

James Murray

FATE plays many strange tricks, but none stranger—and happier—than the prank it played upon James Murray, the extremely good looking youth whose photograph is above.

It wasn't so long ago that James was on water in the famous Capitol Theatre in New York city. Becoming tired of "acting," and having had the opportunity of studying the movie celebrities at close range daily, James decided to go to Hollywood and get in on the heavy money himself.

All of which he did. Of course it wasn't all as simple as it reads in type, but James got there.

And now comes the strangeness of Fate's little prank. For James's first picture, "Rose Marie," had its initial showing at—you guessed it! The old-time Capitol Theatre!

CAUGHT TRYING TO DUPLICATE HICKMAN CRIME

Sacramento, Cal., Feb. 28.—Outfitted by police and captured red-handed in an attempt to duplicate the crime and crime of Edward Hickman, Los Angeles kidnaper and murderer Robert and Howard Hunter, national brothers, brand 4 in a cell at the city jail here today on the charge of having a plot to exact \$10,000 from Dr. C. L. Blitzer, prominent local physician, under threat of killing the doctor or one of his sons.

The two youths, both with a previous criminal record and both, like Hickman, on parole, were brought and taken prisoner without a struggle at a local spot on the Sacramento river near Sacramento, yesterday. They were in the act of passing a package left by Dr. Blitzer, supposed to contain the \$10,000 demanded of him, when police officers arrived in and made the arrests.

TWO SUITS STIR MOVIE COLONY

Los Angeles, Feb. 28.—Two suits on file in superior court here today have caused a sensational stir in the movie colony.

Claiming \$750,000 in damages, Mrs. Corabel Bernstein brought action against Mrs. Lillian Coogan, mother of Jackie Coogan, juvenile star, alleging alienation of the affections of her husband, Arthur Bernstein, business manager of the Jackie Coogan Picture corporation.

At the same time, Mrs. Bernstein, through her attorney, Charles W. Chadwick, filed suit against her husband for divorce, charging him with indirect friendship with Mrs. Coogan and cruelty toward herself.

The divorce complaint states that Bernstein's salary is \$3,000 a week and his community property totaling \$250,000. It asks \$1,000 alimony per month and \$10,000 in attorneys' fees.

HECK MANAGING UNIQUE CONTEST AT OHIO STATE. Columbus, Feb. 28.—Edward Stanton Heck of Salem, editor of the Ohio State Engineer monthly magazine of the College of Engineering is in charge of a unique contest being staged by that magazine at the university.

In order to get the students enrolled in the College of Engineering better acquainted with the faculty of the college, the magazine is planning to publish a silhouette picture of each member of the instructional staff. The pictures will be numbered and the student who identifies the greatest number of the pictures will be the winner of the contest. The prize will be awarded in May.

Heck is a junior in the engineering college. He is affiliated with the Triangle fraternity, engineering society.

Coolidge Asks Fund To Fight Boll Worm. Washington, Feb. 28.—Reports of the spread of the Pink Boll worm of cotton in Texas today caused President Coolidge to ask that \$150,000 be provided immediately by congress for the department of agriculture's campaign against the cotton pest.

He previously had requested \$100,000 for immediate use. The recommendation calls for a total appropriation of \$400,000, the balance to be available next year.

First Train Passes Thru Moffat Tunnel. Denver, Feb. 28.—The first regular passenger train passed through the Moffat tunnel Monday after the formal opening of the tunnel Sunday. A crowd of 2,500 people attended the ceremonies.

High School Notes

The Salamasevers, the dramatic society of the High school, held a business meeting Monday at the school.

The first play to be presented is "The Willing Performer" by George Ade. Parts were assigned certain members by Helen Koenig.

Wayne Morron, president of the club, gave a little talk on the parliamentary style of conducting meetings and after some discussion this style was approved. This is a very formal method of conducting a meeting and is now widely used.

A committee was chosen for selecting a pin for the society. This is to become the standard for the club.

The constitution was read by the president and adopted. No amendments were suggested.

Miss Stahl gave a delightful talk on loyalty. She said: "There must be no dissension among the members of this club. All must work toward one end, and keeping that in mind and holding it as the objective, must move toward it and accomplish it. Remember, in union there is strength."

The next meeting will be held in two weeks.

BISHOP TALBOT DEAD; AGED 79. Tuckahoe, N. Y., Feb. 28.—Bishop Talbot, the oldest bishop in the Episcopal church, died at the age of 79 last night at the Tuckahoe home of his daughter, Mrs. Franklin D. Alden.

Bishop Talbot, who retired from active duty last October 1 because of illness, formerly was presiding bishop of the Episcopal church. He suffered a stroke in Boston recently and had been failing in health since.

Bishop Talbot was the author of "The People of the Plains" and "The Bishop Among the Rocks." He was one of the group of missionary pioneers who played a conspicuous part in the winning of the west.

Canton—Use of traffic lights has effected a saving of more than \$12,000,000 for New York city. The installation of 2000 traffic signals has eliminated the necessity of employing 8000 additional policemen.

For healthful hot cereal, try SHREDDED WHEAT PORRIDGE.

Cover the bottom of a saucepan with water, add the biscuits, broken up. Boil and stir until the mixture thickens. Sait and serve with milk or cream. Ready in two minutes.

Miss Stahl gave a delightful talk on loyalty. She said: "There must be no dissension among the members of this club. All must work toward one end, and keeping that in mind and holding it as the objective, must move toward it and accomplish it. Remember, in union there is strength."

The next meeting will be held in two weeks.

BISHOP TALBOT DEAD; AGED 79. Tuckahoe, N. Y., Feb. 28.—Bishop Talbot, the oldest bishop in the Episcopal church, died at the age of 79 last night at the Tuckahoe home of his daughter, Mrs. Franklin D. Alden.

Bishop Talbot, who retired from active duty last October 1 because of illness, formerly was presiding bishop of the Episcopal church. He suffered a stroke in Boston recently and had been failing in health since.

Bishop Talbot was the author of "The People of the Plains" and "The Bishop Among the Rocks." He was one of the group of missionary pioneers who played a conspicuous part in the winning of the west.

Canton—Use of traffic lights has effected a saving of more than \$12,000,000 for New York city. The installation of 2000 traffic signals has eliminated the necessity of employing 8000 additional policemen.

For healthful hot cereal, try SHREDDED WHEAT PORRIDGE.

Cover the bottom of a saucepan with water, add the biscuits, broken up. Boil and stir until the mixture thickens. Sait and serve with milk or cream. Ready in two minutes.

Eight-Year-Old Girl Is Youngest of Evangelists

HELEN ANNA SMITH
(Continued from Page 1)

NEW YORK is a hard town to thrill. It's used to nearly everything. Nothing "burns it up," as the saying goes. But there are exceptions that prove the rule, and one of these rare exceptions is little Helen Anna Smith.

Imagine a girl at the tender age of eight years ascending the pulpit and conducting evangelical services!

It may not sound reasonable, but that's just exactly what Helen Anna's doing in the metropolis—and doing well. This remarkable youngster started her career last summer in the South during a religious revival. Her beautiful eloquence and her remarkable grasp of her subject, together with the rare power of a personality that enchants and holds an audience, has brought her overcrowded churches wherever she speaks.

Helen Anna bears her honors modestly. She's a wholesome, healthy and "regular" little American girl. And she's going to be a big success, long before she "grows up," because she's really a success now!

SPELL OF LINDY GRIPS CENTRAL AMERICA TODAY

Seven Republics Prepare To Extend Network Of Air Lines

Washington, Feb. 29.—The spell of the Lone Eagle of the Atlantic has gripped the republics of the Caribbean and Central America.

As a direct result of Colonel Lindbergh's good will tour of Latin America, commercial interests of seven republics backed by American capital and technical advice, are preparing to extend a network of commercial air lines from Key West, Florida, to the Panama Canal.

Cuba already has begun a survey for a national air mail service extending from tip to tip of the 600-mile island.

Porto Rico, Haiti and Cuba have consented to support an inter-island passenger and mail service over a 900-mile route.

The inter-island route would connect with the all-Cuban mail route at Santiago, and the all-Cuban route would converge with the Havana-Key West lines at Havana, thus bringing the two new lines into direct contact with the United States.

Panama has expressed a sympathetic interest in a project to connect the Caribbean island route with Panama City, which would connect North and South America by air for the first time in history. Service already exists between Panama and Colombia, and between Colombia and the principal east and west coast cities of all South America.

The new Cuban service, to begin as a daily mail run and gradually be expanded to passenger service, will be operated by the Pan-American Airways, Inc., which now operates the Havana-Key West service.

Panama has been selected for the Central American terminus of the potential air routes.

BALCHEN FLIES TO DETROIT TO SEE EDEL FORD

Detroit, Feb. 28.—Lieut. Bernt Balchen, formerly of the Norwegian navy, and a member of Com. Richard Byrd's crew on both his North Pole and trans-Atlantic air voyages, is in Detroit today.

Balchen landed in Byrd's new trimotor Fokker plane at Dearborn at 6:15 last night, after its maiden voyage, a non-stop flight of about eight hours from New York, here. This is the plane which will be the nucleus of Byrd's forthcoming Antarctic expedition this summer, on which Balchen will serve as a pilot.

Balchen may see Edsel Ford today.

Denies Engagement

Muriel Slesman of Detroit is not affianced to Horace E. Dodge, Jr., according to her father, who spoke reports that Muriel, who's in Paris with her mother, would soon wed the recently divorced young millionaire.

NAVY DIRIGIBLE

(Continued from Page 1)

huge searchlights at the field.

Her mooring was effected after maneuvering of about 150 men without undue trouble. Three hundred soldiers helped anchor the ship.

The work of Lieut. Commander Charles E. Rosendahl and officers and men of the crew in handling the ship was accorded high praise from all sides.

Practical Demonstration
Naval officials hailed the dirigible's feat as a practical demonstration of the feasibility of using dirigibles for long distance flights.

The portable mooring mast to which the ship was anchored was constructed in the United States under the direction of Commander Rosendahl and was shipped to the Canal zone about two weeks ago.

The dirigible's successful flight was originally planned three years ago but was abandoned at that time because of a shortage of helium gas.

Performs Well
The ship performed up to expectations in every way, although Commander Rosendahl declared after the landing that weather conditions had not proved as favorable as had been expected. The inclement weather, encountered by the ship, was given as the reason for its tardy arrival. It had been expected at 1 p. m.

A huge throng had gathered at the field when the anchorage was made. Roads leading to the field were jammed with vehicles of every description.

Ground lights on the field and flood lights atop the hangars and houses on the field illuminated the scene to the gleam of the sun.

SOCIETY

Music Study Club
Mrs. F. J. Stoddy was hostess to associates of the Music Study club at her home, South Union st., Monday afternoon.

Questions on chapter 4 of the study book, "Epochs in Musical Progress," were discussed by the different members.

Mrs. J. W. Hundertmark opened the program by playing a group of piano solos composed of these numbers: "Morning in E-flat," "Sonata in E-flat," and "Pavane," piano by "Night Bird." Mrs. J. W. Hundertmark and Miss Helen Frank.

Mrs. Robert Greenberger gave the concluding number, "Sonata by Tchaikovsky in Two movements."

On March 12 the members will meet with Mrs. James Hill.

The Blue Monday Club
Miss Ruth Paxson entertained members of the Blue Monday club Monday evening at her home, East Seventh st.

Two tables of 500 entertained and the prize for high score was awarded to Miss Elizabeth Ward. After the games a lunch was served by the hostess. The appointments were in keeping with St. Patrick's day.

Miss Bernice Gibson and Mrs. Holland Paxson were invited guests. In two weeks Miss Wanda Matthews will entertain the members at the home of Mrs. L. A. Beck, East High st.

—S. S. Class Meets

Members of the Junior Loyal Sons and Daughters Sunday school class of the Phillips church met Sunday afternoon at the church. There were 18 members and several visitors at this meeting.

After the business meeting, a social period was enjoyed and games, music and entertainment. A lunch was served by Mrs. Earl White and Miss Clara Tully.

The next meeting will be in one month.

—Three Links Club

About 40 members of Three Links Social club and their families enjoyed a covered dish supper Monday evening at the 1 O O F hall, Broadway. The evening was spent playing cards and after the supper members attend the district meeting held at Washingtonville.

Next Monday evening the members will hold a guest dance at the hall.

—Masonic License

A marriage license has been issued by Probate Judge Louis Riddle to Albert A. Ball, of East Liverpool, recently married, and Cora Anderson, a widow, also of East Liverpool. They were married at the presence of the Union T. P. church by the Rev. J. M. Cameron.

Mrs. Emily Baunach of Minerva, spent Tuesday in Salem.

Markets

LOWER PRICES

New York, Feb. 28.—Lower prices were quoted for most of the active industrial stocks at the opening of the market today.

The motor stocks were fairly steady, with Chrysler up 1/2 at 56 1/2; General Motors up 1/4 at 135 1/2; Mack Trucks up 1/4 at 93; Studebaker up 1/4 at 61 1/2; Hudson down 1/4 at 75 1/2; American Smelting down 1/4 at 109 1/2; American Can down 1/4 at 75 1/2; Radio down 1/4 at 90 1/2; International Nickel down 1/4 at 77 1/2. Business and irregularly characterized the stock market in the early trading today. Speculative interest revolved around a few of the active specialties in which the pools position have been variously repositioned. The motor stocks continued to give a better account of themselves, and a few of the oil shares sold higher.

Preparation in the banks for the March financials was reflected in a slight firming up of the call loan market, with the rate advanced from 4 1/2 to 4 3/4 per cent. Wall street looks for a continuation of a comparatively tight, short-term money market after the first tax payments have been made, which will be between the tenth of March and the middle of the month.

Industrial and business conditions were generally unchanged, though both the railroad and the industrial earnings reports rebounded since the close of yesterday's market were more favorable than last week's crop. First estimates of January net railroad income put a more favorable construction on the financial position of the big transportation companies. Pennsylvania announced the good record inaugurated last year when all former peace time records were smashed.

Short selling of the pool favorites has been so heavy in recent weeks that a short interest of from 100,000 to 500,000 shares is said to exist in stocks like Radio, International Nickel, Freeport Texas, Montgomery Ward etc. These and other stocks in that group rallied a few points in the second hour on professional buying, but on the whole the market remained in its dull and narrow position.

Commodity and futures markets were steady and inactive. Cotton and coffee add a few points higher, grain was firm in the early trading.

CHICAGO LIVE STOCK

Chicago, Feb. 28.—Hogs—Receipts 38,000; market 10-15c lower; top 8.30 bulk 7.75-8.20; heavy weight 7.60-8.10; medium weight 7.90-8.25; light weight 7.50-8.30; light hogs 6.50-8.20; packing sows 6.65-7.30; pigs 6.75-7.40; holdovers 29-000.

Cleveland, Feb. 28.—Hogs—Receipts 2,500; market steady to 1/2c lower; top 8.75; quotations, 250-350 lbs 8.25-8.50; 200-250 lbs 8.50-8.75; 100-200 lbs 8.60-8.75; 130-100 lbs 8.75-8.75; 90-130 lbs 8.75-8.75; packing sows 8.50-8.75.

Cattle—Receipts 200; calves 250; market cattle slow-steady; calves 1 1/2c lower; bulk quotations, 8.50-9.00; heavy 8.50-9.00; beef cows 8.75-9.00; light cutters and culler cows 8.25-8.50; vealers 13.00-15.50.

CHICAGO GRAINS

Chicago, Feb. 28.—Grains opened steady to a shade lower today. Wheat was 1/2c to 1/4c lower, corn unchanged to 1/4c higher. Opening grain quotations:

Wheat—March 134 1/2; May 134 1/2; July 133 1/2; 1/2c.

Corn—March 94 1/2; May 94 1/2; July 93 1/2; 1/2c.

Oats—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Barley—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Rye—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Soybeans—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Flour—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Wool—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Gold—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Silver—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Dollars—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Pounds—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

Francs—March 53 1/2; May 53 1/2; July 52 1/2; 1/2c.

DIRCKS HINTS BRIBE OF BROWN BY 'THE GANG'

Sandusky Aspirant For Presidency Peeved At Secretary

Columbus, Feb. 28.—Taking exception to what he deemed unnecessary delay on the part of Secretary of State Clarence J. Dirks in ruling that he was not eligible to enter the Ohio Republican primaries as a candidate for the presidential nomination, Charles J. Dirks, Sandusky, in a letter received by Brown today raised the question whether Brown's ruling might have been due to "a bribe from the gang."

Brown last week ruled that Dirks was ineligible on the grounds that he was a naturalized citizen of the United States and because he failed to comply with the provision of Ohio law which requires that such declarations of candidacy must contain the names of five valid electors of Ohio.

The time for filing declarations of candidacy expired at midnight last Friday.

Failed to Reach Dirks

Dirks wrote that he did not receive official notification of Brown's ruling until last Saturday and that this alleged delay prevented Dirks from reaching in a candidate for vice-president or governor.

Dirks declared that a clerk of the county election board told him it was not necessary to place the signatures of five electors upon his declaration of candidacy.

Brown today explained that he was unable to notify Dirks of the ruling any sooner. He said he took action as speedily as possible after receiving official notification from the Erie County Probate court concerning the naturalization of Dirks.

Widespread publicity attached to Dirks' declaration because of his plank favoring legislation which would permit deliveries of wine and beer to homes "just like milk."

SHIP SCHEDULE ON 3-YEAR PLAN

Washington, Feb. 28.—The house naval affairs committee, recommending its \$274,000,000 naval program bill, today stood pat on its provisions that ships must be laid down in three years.

The committee, however, struck out a provision that they must be completed within six.

This was said to be a matter of business economy, since this limitation would tend to increase bids for construction of the vessels.

PLANT FOREST TREES MIDDLE OF NEXT MONTH

Spring planting of forest trees will begin this year about the middle of March, in the opinion of F. W. Dean, extension forester at the Ohio Agricultural Experiment Station at Wooster. This is conditional upon the continuation of such spring-like weather as has been in effect during much of February.

Although the cherry stock of transplanted pine of the state department of forestry is practically exhausted, there are still plenty of good trees for reforestation work. There are still available at the state forestry nursery quantities of red, Scotch, and Corsican pine seedlings two years old; hardwood seedlings of black walnut, white ash, sugar maple, red oak, tulip poplar, catalpa and black locust.

Dean. Orders for these trees should be requested through the offices of the State Forester or the Extension Forester at Wooster.

The orders for trees for reforestation should reach the offices of the foresters not later than March 1. Many persons in the state have received application blanks during the past few months, but have failed to order their trees promptly and will be left without them unless the orders come in within the next few weeks, Dean says.

BRUMBY FREED OF BLAME FOR SUB DISASTER

Washington, Feb. 28.—Rear Admiral Frank H. Brumby, who was vigorously criticized in the first report of the naval board of inquiry on the S-4 disaster, has been acquitted by the supplementary investigation ordered last week by Secretary Wilson.

The second report of the naval court, which has concluded its job of setting forth completely and with particularity the reasons for the disaster, will be published in a week or ten days, following review by the secretary and the judge advocate general.

Although the reconstituted court confirmed its original conclusions that the commanders of both the S-4 and the coast guard destroyer Paulding were equally responsible for the disaster, the second report also endorses the statement of the navy bureau of navigation that the "major presumptive responsibility" for the crash rested with the S-4 because of the relatively higher visibility under the existing weather conditions.

Prince Improved

Melton, Monrovia, Eng., Feb. 28.—Prince Henry, younger brother of the Prince of Wales, who was injured while hunting yesterday when he was thrown from his horse, was resting easily today. King George and Queen Mary have been reassured that their son was not seriously hurt.

Obituary

LINDLAY M. BRACKIN

Relatives here have been advised of the death of Lindlay M. Brackin 86, of Colerain, which occurred Tuesday morning in Orlando, Fla. Death was due to pneumonia. The body will be brought back to Colerain, where the funeral service will be held next Monday.

RATE EDUCATION WITH BUSINESS

School Waste Charges Are Defended At Boston Education Meet

Boston, Feb. 28.—With the charge of President A. Lawrence Lowell of Harvard that American schools are wasteful and the ringing defense of the schools by Dr. Frank D. Brynion, superintendent of schools in El Paso, N. Y., still the chief topic of discussion the National Education association convention delved into other educational subjects today.

Mrs. Edweline L. Lindbergh, here to receive a gold medal from the association in recognition of the aviation achievements of her distinguished son, attended several of the convention meetings today.

Yesterday the clock hands with 124 delegates at a reception in the hall of flags in the state house. Also in the program line was Gov. Alvin T. Dyer, Miss Cornelia Adair, of Richmond, Va., president of the association, and J. M. Gwynn, San Francisco school head.

Cleveland Plan Explained

The meeting of the members of the department of superintendence was largely attended today.

F. S. Richardson, superintendent of Webster parish schools, Minden, La., made a comparison of the business of education with the large industries. He said:

"The entire business of education is the largest business in the world save that of our federal government. It is a business with billions of invested capital, an annual expenditure of millions, earnings that cannot be computed with more than one hundred million stockholders and a great army of workers of which we are a part."

The Cleveland plan for apprentice training was explained by Howard L. Briggs, director of vocational and practical arts education of the Cleveland public schools. He said:

"At the present time we are training every apprentice of a brick-layer, carpenter, plumber, electrician, painter, paperhanger, sheet metal and stucco worker in the city of Cleveland. We are training a large percentage of the machine shop apprentices, and all the auto mechanics apprentices."

At every turn Mrs. Gosselin has been told the same thing—get credentials. She has none.

Mrs. Gosselin has called at Mrs. Lindbergh's home three times only to find her away.

John Lodge, mayor of Detroit, and Lindbergh's uncle, informed Mrs. Gosselin he would be glad to see her after she has seen Mrs. Lindbergh.

"Mrs. Lindbergh is now in Boston."

Among the articles Mrs. Gosselin has are a book autographed by several widely known Frenchmen, a tapestry illustrating Lindbergh's exploit and a painting of the flier.

MINERS ATTACK INJURES MANY, WRECKS HOUSES

Riots Near Steubenville Start As 500 Strikers Attack Guards

Steubenville, Feb. 28.—Rioting was resumed today near the Dorothy mine of the Youngstown and Ohio Coal company at Glen Robin. Seven men were arrested and the new outbreak was quickly quelled. Deputy United States marshals took the arrested men to Columbus where they must answer to the charge of violating a federal injunction against interference with the proposed operation of the mine on a non-union basis. More arrests were indicated.

Steubenville, Feb. 28.—Precautions were taken today to prevent a recurrence of the serious rioting which broke out at the Dorothy mine of the Y & O Coal Co. at Glen Robin last night.

Several persons were injured, two houses were wrecked and tear bombs were brought into play to quell the riot when a mob of 500 striking miners and sympathizers assembled and attacked ten special guards, including six deputy United States marshals.

It had been planned to start the mine today. When the guards arrived in two machines, intending to make their headquarters in the two company houses, they were met by the mob which included nearly 100 women. The attack was begun at once.

Reeks were hurled at the guards and the two houses wrecked by a barrage of missiles.

Six strikers were beaten in the melee. Guards used their black-jacks to protect themselves. Three of the guards were so badly hurt they had to be taken to Martins Ferry for treatment.

A squad of deputies arrived from the office of Sheriff W. T. Allison and used tear bombs to break up the gathering and stop the rioting.

Col. Caldwell, representative of Gov. Denney, and Sheriff Allison and his forces were maintaining order this morning.

Will Re-open Bank At West Lafayette

Coshocton, Feb. 28.—Re-opening of the Bank of West Lafayette was assured today following the action of stockholders, in a meeting late yesterday, in assenting to a 100 per cent assessment, fixed by the state banking department.

Though the audit has been completed, the institution will remain in the hands of the state banking department until the assessment is paid. The bank has been closed for a month, directors having voluntarily asked the state to make an audit.

H. A. Sicker, former cashier, has been replaced by an appointee of the state department of banks.

CARD OF THANKS

We wish to express our sincere appreciation to relatives, friends and neighbors for sympathy extended us and for the beautiful floral offerings in our recent bereavement; also desire to thank Rev. Weist for his consoling words.

"ORPHAN" VETS URGED TO JOIN SERVICE GROUP

Foreign Wars Vets Post
Points Out Advantages
Of Membership

"Legislation already enacted in behalf of the ex-service man, and proposed measures now before legislatures and congress, should prove conclusively to the orphan veteran that he should join some veterans' group."

That statement was issued today by Allen K. Reynolds post No. 892, Veterans of Foreign Wars. According to the post, there are many such "orphan" veterans living in and near Salem, and these should become members of some veterans' group, the post adds.

Government benefits already secured for the well and disabled were attained largely through the efforts of organizations like the V. F. W., says the post. "Side by side the representatives of these groups man the guns at Washington, constantly on the firing line that protects the interests of ex-service men in general. Without the organized presentation of veterans' problems to congress, the lot of the veteran would be a sorry one."

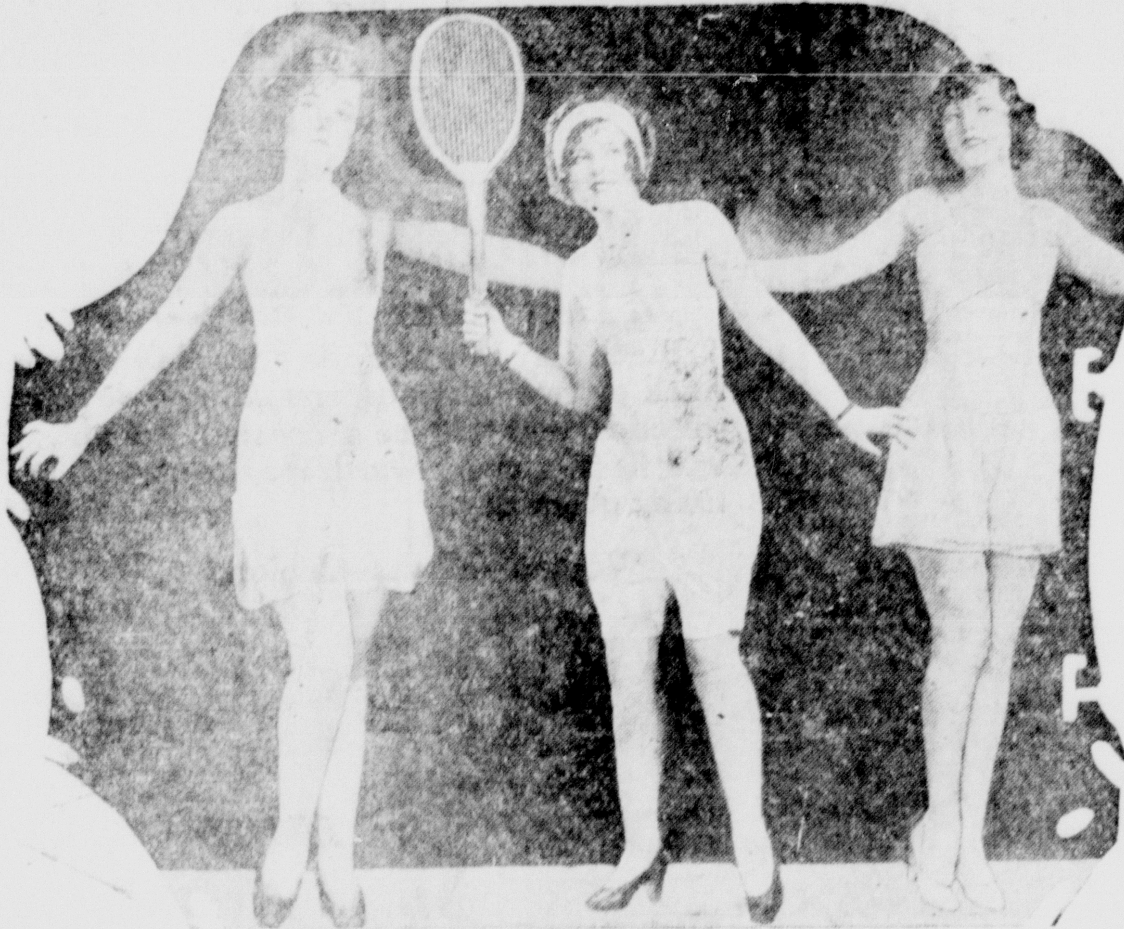

An effort is being made by the V. F. W. to impress on such unattached veterans the fact that they are eligible to membership in one or more of half a dozen veterans' societies which need their moral support.

It is pointed out that though the local post may not offer any special inducements, it identifies the veteran with a national organization which is operating for his own good. The unattached veteran, it is declared, may not feel indebted to the local unit for any personal favors but nevertheless its influence through the national organization is always at his back and call.

The post's statement adds that "although veterans who steer clear of all ex-service men's societies will continue to enjoy benefits secured in their behalf, they have no legitimate reason for staying on the outside."

Allen Reynolds post meets every Thursday night. Veterans of any war are urged to visit the post.

THE LATEST MODES IN "UNDIES"

Once upon a time—and it wasn't so long ago, either—it was considered simply horrifying to speak of ladies' underthings with anything but veiled breath. But such gorgeous creations have been coming forth of late years that the former "unmentionables" are now very much in the limelight. Here are presented some of the typical modes. Left—The new singlette undergarment of

tailored glove silk which permits no break from shoulder to hip. Center—The singlette used as a tennis garment. Right—An undergarment cleverly designed to take the place of several pieces. This is another singlette model, which gives bust and diaphragm support, and ends in a French drawer bottom edged with lace. The first two pictures were posed by Lillian Gilmore, and the third by Ethylene Clair, both movie ingenues.

She's a Peach

Grace Carter of Scott, Ga., registers her personality even in a snapshot, and no wonder, Grace has just been voted the "best sport" of all the students attending Andrew College at Cuthbert, Ga.

KANAWHA RIVER IMPROVEMENT IS GIVEN APPROVAL

Washington, Feb. 28.—Expenditure of \$3,500,000 to provide a fine foot channel and extensive hydro-electric development on the Kanawha river, West Virginia, was recommended to congress by the War department today.

The improvement calls for modifying the existing project by replacing four locks and dams with two larger locks and dams the location to be left to the engineers.

The War department reported against the following proposed improvements:

Vineyard Haven Harbor, Massachusetts; Bristol Harbor, Rhode Island; Oak Bluffs Harbor, Martha's Vineyard, Massachusetts.

PEACE SOCIETY TO CELEBRATE

Cleveland, Feb. 28.—A preliminary meeting to arrange for the centennial celebration of the American Peace society in Cleveland, May 7-11, was held here Monday.

More than 700 persons attended. Judge Florence Allen spoke at the session and lauded the American woman of 1928 from a political standpoint.

Fred Ramsey, chairman of the cabinet of the local committee, outlined the plans for the centennial gathering and read a message from Congressman Theodore E. Burton, president of the peace society.

Burton's message stressed the importance of the coming conference from an international standpoint and expressed the hope that it would lead to "the right way in disarmament—through disarming policies."

Chairman Ramsey announced that Sir Emsa Howard and Count Paul Claudel, British and French ambassadors to the United States, respectively have accepted invitations to speak at the centennial and that Antonio, Sen. Jos. De Bustamante, judge of the permanent court of international justice at The Hague and president of the recent Pan-American conference in Havana, would attend.

Federal Old Age Pension Proposed

Washington, Feb. 28.—Declaring that old-age people in the United States do not get enough in the years they are expected to enable them to live by anything but old-age pensioners, Senator Joseph R. Burton, of Wisconsin, introduced a bill providing for a federal system of old-age pension.

A weekly pension of \$12 per week would be paid to anyone 65 years of age or over.

PUT CREAM IN NOSE
AND STOP CATARRH
Tells How To Open Clogged
Nostrils and End Head-Colds.

You feel this in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more dullness, headache, no hacking, sniffling, mucous discharges or dryness, no struggling for breath at night.

Tell your druggist you want a small bottle of Ely's Cream Balm. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head, soothe and heal the swollen, inflamed mucous membrane and your cold instantly.

It is just what every cold and croupy sufferer needs. Don't stay snuffed-up and miserable. Adv.

Do you
take cold easily?

Your mucous membranes are sensitive. Cold germs weaken them. And when you have chronic colds you slip into a catarrhal condition without knowing it.

Don't let colds "hang on." You can quickly relieve the inflammation of the delicate linings of throat and nose, throw off congestion and stored-up impurities with Hall's Catarrh Medicine. Its tonic effect aids nature in restoring a healthy condition, drives away catarrh and helps you go thru the winter without colds. Ask your druggist. Price 35c.

R. J. BURNS
HARDWARE CO.
53 MAIN STREET

We have become headquarters for MICHELIN TIRES AND TUBES

It is our business to know about tires, and we are positive that the best tires made today are Michelins. Just consider these facts:

Fact 1 Records covering the experience of many thousands of motorists during the last two years show that more than 80 times out of 100 you get more mileage by changing to Michelins.

Fact 2 The increase in mileage which Michelins give is great; records covering millions of miles indicate Michelins go 36% farther. That means 4,000 or 5,000 miles extra for you.

Fact 3 You don't pay for this extra mileage. Unlike many other tire manufacturers, Michelin specializes in making one quality only—the

best. This policy has resulted not only in good tires but in better tires economically produced. On top of that, we keep our profits as low as possible, believing as we do in low prices and large sales. The net result is, we sell Michelins at the price of ordinary tires.

Fact 4 Don't overlook Michelin Ring-Shaped Tubes. Because of their superior shape and composition they outlast all others. And because they are compounded with anti-mony, they keep the casing as much as 20° cooler, thus increasing its life considerably.

PRICES

30x3 1/2 Regular	\$8.65
30x3 1/2 Oversized	\$10.55
29x4.10 Universal	\$9.55
30x5.25 Standard	\$17.25

All other sizes at proportionate prices

We assure you that if you buy Michelin Tires you will get tire satisfaction and tire economy such as you never enjoyed before.

Take us at our word.

Mrs. Berton Advises Women on
Motherhood and Companionship

"The greatest joy a woman can know is the blessing of motherhood," writes Mrs. Margaret Berton of Kansas City. "It is a joy which is not shared by any other woman who is not a mother. I believe hundreds of other women would like to know the secret of my happiness and I will gladly reveal it to any married woman who will write me."

Mrs. Berton advises women who are considering motherhood to first of all, to be sure they are in good health and to have a good husband. She says that a woman should be able to support her family and to be able to do so without complaint.

Mrs. Berton says that a woman should be able to support her family and to be able to do so without complaint. She says that a woman should be able to support her family and to be able to do so without complaint.

3 NAVAL AIRMEN MISSING; SEARCH WATER AND LAND

Trio Disappears While On Simple 2-Hour Flight To Annapolis

Washington, Feb. 28—Close scrutiny of the waters of Chesapeake bay having yielded no clue, the aerial search for three missing naval airmen spread out farwise today over the wooded hills of Maryland and Virginia.

Land and seaplanes joined in the search at dawn today for the three officers and the amphibian plane who have been missing for nearly 36 hours. They disappeared completely while on a simple two-hour flight from Hampton Roads to Annapolis.

The missing officers are: Commander T. G. Elyson, one of the most expert pilots in the navy; Lt. Com. Hugo Schmidt, of Brooklyn, and Lt. Roger Ranshousen of Springfield, Mass. Elyson, the first man to qualify as a naval air pilot, and who trained under the Wright brothers and Glenn Curtis, was a native of Richmond.

They left Hampton Roads at 2 o'clock yesterday morning in an amphibian plane. They should have reached Annapolis about 4 a. m. but when noon came and they had not arrived, some alarm was felt and scouting planes were sent out to comb the waters of the Chesapeake for trace of them. It was believed they might have experienced motor trouble and landed in the water, but the searching planes dived all afternoon and into the night without getting a trace of them.

Land Crash Possible

The search was extended this morning on the theory that in the darkness they may have gone off their course, which has principally over water between Hampton Roads and Annapolis, and crashed on land in the wooded areas on either side of the bay. Naval authorities came reluctantly to the conclusion all must have been killed or seriously injured else they would have been able to report before this.

The waters of the Chesapeake were quiet all of yesterday, at least there was no roughness sufficient to have sunk the amphibian craft, in the opinion of flyers.

Commander Elyson left Norfolk to go to the bedside of his 12-year-old daughter, Mildred, who is critically ill in the naval hospital at Annapolis. Mrs. Elyson was not informed until this morning that her husband was missing. She knew he was due to leave Hampton Roads yesterday morning and was considerably concerned over his failure to arrive yesterday.

Causing a Stir!

New York, Feb. 28—With the hunt for the "torch murderer" of Margaret Brown, Park ave. governess, leading into "blind alleys," police sought today two persons, a man and a woman, who were friends of the victim.

Authorities hoped that these two might provide information which would put them on the trail of the fiend who burned Miss Brown alive near Bernardsville, N. J.

What About This?

Judge E. C. Harrel of Brownwood, Texas, is so sore on football that he intends to have a law passed making it illegal in Texas, that is, if he is elected to the State Legislature.

ABOUT TOWN

Knights of Columbus

Salem council No. 1818, Knights of Columbus, at a meeting Monday evening received two applications for membership.

A basketball team from Salem council will go to Wellsville Tuesday evening to play with a team from the council there.

On Friday evening the bowling team will play the Wellsville council team at Wellsville.

K. of P. Meeting

A state officer is expected here for the county meeting of Knights of Pythias at which Salem lodge No. 142, will be host next Monday evening.

Plans for this meeting were made at the regular lodge session last night at the hall, Chestnut st.

Four applications were received at this session and initiation will claim attention at the next meeting.

See Fight Pictures

Motion pictures of the Dempsey-Tunney fight at Chicago, loaned by W. H. Dunn, were exhibited to members of Charles H. Carey post, American Legion, at the meeting Monday night at the post home. The regular business meeting followed.

Auto On Fire

French used chemicals to extinguish a fire in the auto of C. S. Chisholm, West School at this morning. The alarm was received at 11:40 a. m. Little damage was done by the blaze which centered in the carburetor.

Recent Births

Mr. and Mrs. Walter Hively are the parents of a daughter, born Monday. She has been named Geraldine Belle. Mrs. Hively before her marriage was Miss Vera Dailley.

JERSEY MURDER SUSPECT SEEN

100 Policemen Searching Woods For Slayer Of Woman

Somerville, N. J., Feb. 28—A hundred policemen and civilians today plunged into the dense woods back of the Richard Lindbury estate on Bernardsville road in pursuit of a man seen to enter the thickets and known to answer the description of the slayer of Margaret Brown.

The man was seen to enter the woods by Elmer Trimmer, superintendent of the Lindbury estate. He carried a bundle of newspapers and looked about him in a furtive, hunted manner.

The same man was seen to enter the woods yesterday morning, Trimmer said, but he made no report to the police at the time.

While the police of Bernardsville and Somerville joined forces in the hunt and civilians, armed with all manner of weapons, augmented their forces, a troop of state police under command of Capt. J. J. Lamb, were rushing to the scene from the Morristown barracks.

PARKING RIDDLE MAY BE SOLVED BY SOUTHERNER

System Operating Much Same As Ferris Wheel Is Proposed

Memphis, Tenn., Feb. 28—Solution of the automobile parking problem of America may go to a million-dollar Memphis organization, the Auto-Tower corporation, whose president, Clarence Saunders, millionaire grocer, has announced the sale of 15,000 shares of stock and is ready to launch the adventure.

Erection and sale on a royalty operation basis of steel constructed towers with a series of lifts or spaces in two parallel sections and connected on an endless chain system—operating much the same as the ferris wheel—is the basis on which the corporation is formed.

Saunders, who owns a chain of grocery stores, former president of the Piggy-Wiggly corporation, has demonstrated the feasibility of the device in a working model and it has been passed on favorably by some of the leading engineers of the country.

Approved by Engineers

J. E. Morton is inventor of the new parking system. He holds patents and the corporation has purchased manufacturing and sales rights for the entire United States.

E. L. Harrison, engineer and architect, will start work immediately on the construction of a full-size, electrically operated demonstration unit capable of holding 20 cars. This will be demonstrated to business men throughout the United States.

The device takes up about the same space as two parked autos in the congested business district. The patents provide for a special device which permits the cars to be sent up one side and down the other.

The cars cross at both the top and bottom and can come down either side of the tower.

Saunders announced that 5,000 shares of Class A common stock and 10,000 shares of Class B had been sold to business men of Memphis and Nashville, Tenn.

Long Experiments

Officials of the company have been experimenting with the new invention for more than six months. Saunders issued the following statement about the invention:

"Occupying a minimum of space and labor the operation is as simple as that of automatic elevators. We believe it is going to be one of the biggest things the country has ever seen. Traffic experts, engineers, electrical and mechanical experts have seen and praised it."

"It is the greatest solution of the rapidly growing auto parking problem ever advanced."

GRAND JURY TO PROBE BUREAU

Boston Veterans Bureau Under Fire of U. S. Attorney Today

Boston, Feb. 28—A federal grand jury investigation of the official workings of the United States Veterans Bureau in this city will be made next week, according to Assistant U. S. Atty. John P. Spalding today. Spalding will be in charge of the probe.

The investigation follows the arrest of Dr. Isadore Green and Arthur Williams of the bureau on charges of extortion. Other arrests were expected.

Capt. William J. Blake, regional director of the bureau, will co-operate with Spalding in the investigation, as will L. C. Blake of the Department of Justice.

Capt. Blake said he desired to get testimony from any disabled veteran who feels that he has been "shaken down" by bureau employees.

Mullins Accepts Damascus Five's Challenge For Title Game

MANAGER WITT ACCEPTS DEFT FROM QUAKERS

First Game to be Played In Salem, Second In Damascus

COLUMBIANA FIVE HERE THURSDAY

Boosters Team Has Good Record and Will Make Mullins Step

Mullins today accepted the challenge of the Damascus Quakers for a Salem district championship series.

In a letter to The News in answer to Manager Alton Bye's recent challenge to Mullins, Manager A. V. Witt of the Mullins team says:

"You can state in reply to Bye's challenge that if he insists that Damascus is in our class, we are perfectly willing to give them a lot of education in the line of good basketball."

"The first game is to be played at Salem High gym, winner to take 60 per cent and loser 40 per cent of net receipts. The second game is to be played at Damascus at his convenience with the same financial proposition prevailing. The third game, which is highly improbable, is to be played at Salem. The referee is to be agreeable to both teams."

"If these arrangements satisfy him, let the war go on. Dates can be arranged after his acceptance of our terms."

Bye is expected to reply tomorrow, as Damascus is very anxious to play the Salem five. Bye is of the opinion Damascus has one of the best teams in this part of the state this year.

Columbiana Here Thursday Mullins will play a formidable rival Thursday night at High school gym in the Columbiana Boosters. This independent five has played teams of the same rating as opponents of Mullins all year, and anticipates a victory here.

This game will be the first of a two-game series, the second game scheduled for Columbiana a week from tonight.

In the prelim the Studebakers will meet Wellsville in the final home game of the year for the county league outfit. The closing league game will be played at Damascus Friday night.

Pete Saunders and his teammates have a chance to trim Wellsville Thursday and hope to come through. Damascus probably will be a tough nut to crack, and the dope favors the Quakers.

TEX MAY OFFER LEONARD MATCH WITH HUDKINS

New York, Feb. 28.—Benny Leonard's threatened "comeback" has been taken seriously by Tex Rickard, who will offer the former lightweight champion a match here with Ace Hudkins.

Leonard is aiming at the welterweight title but before he approaches a match with Joe Dundee the boxing commission will insist on a qualifying bout.

The Leonard-Hudkins bout probably will not be held until May. Leonard needs several weeks of training to get back into fighting form after an absence of three years from the ring.

Sudent Coach For Yale Football Crew

New Haven, Conn., Feb. 28.—Marvin A. (Mal) Stevens, the "student coach," will direct Yale's football destinies for the next three years. Stevens, who is still in his early twenties, is enrolled as a student in the Yale Medical school. He was a star halfback of Bill Mallory's championship 1923 eleven.

Announcement of Stevens' appointment to the post made vacant by the resignation of T. A. D. Jones was made by the board of control of the Yale University Athletic association. While his selection had been forecast, the appointment for three years instead of one caused some surprise.

Breaks All Records

Wade Morton of Philadelphia looked supremely content after smashing the world's record for stock cars with his Auburn auto at the race track at Daytona Beach, Fla.

ANOTHER FATHER AND SON ACT

Here is Bob Walsh, son of the famous Ed Walsh, inset. Young Bob recently won an athletic efficiency contest at Notre Dame, South Bend, Ind., where he is a student. Walsh, who is six-three and weighs 203, has the build to go out and emulate his father, one of the greatest catchers in baseball history.

Two All-City League Teams Named By Referee Raesbeck

Referee Makes Comments On Good Points Of Each Chosen

Raphael Raesbeck, referee of City league basketball games, has selected for The News two all-league teams of stars, following the close of the league season's play.

Raesbeck has the following to say about these selections: "Springer, the Masons' lanky player, is undoubtedly the best player in the entire league. He leads in point getting and has held all his opponents down to few baskets. He is aggressive and plays hard at all times."

"Knowlton, handicapped by lack of point getters on his team, did not shine so brightly as did many others of his position, but considering that he had to make any points his team got, and play a five-man defense alone, he gets first call. He has an uncanny eye."

"Saunders, the Masons forward, is a steady and heady player; a good shot and a fine floor man. He would make a good running mate for Knowlton."

"Older at guard is a good all-around player. He can shoot, pass, dribble, and play defense to perfection. He carried his team along as did his running mate, Nick Johnson, of the Prince club."

"Johnson is one of the best guards ever turned out by Youngstown Raven High. He, like Knowlton, was handicapped by poor teammates, and having hurt his ankle in the last of the season, he was unable to finish with his usual ability."

"One of the second team, Fogg and DeCrow at forwards make a fine pair. Both are fast, heady, good shots and fine defensive men. Flp, at center, a long shot artist, is Springer's nearest rival. Ellsworth is a good standing guard, while Sartick is a smart running guard. They would go good on a team together."

Training Camp Notes

Cathina Island, Cal., Feb. 28.—With all of his Cubs finally in Camp Manager Joe McCarthy has divided them into two teams for the purpose of practice games and to alternate at fielding and batting practice. Kiki Cuyler appears third in the lineup.

Chicago, Feb. 28.—The White Sox, under the direction of Manager Ray Schalk, were to leave for their Shreveport training camp today. Chalmers Cissell, the new \$125,000 addition to the Sox family, is on deck and ready to start south with the team.

Hot Springs, Ark., Feb. 28.—Members of the New York Giants, who have been "boiling out" here will leave today for the regular training camp at Augusta, Ga. In the first practice game of the season, two scrub teams battled to a 2 to 2 tie yesterday.

St. Petersburg, Fla., Feb. 28.—The New York Yankees will hold their first regular workout today, if Jupiter Pluvius is agreeable. Rain practically ruined the opening day festivities yesterday.

Clester, Fla., Feb. 28.—Babe

ALL-CITY LEAGUERS	
First Team	
Left forward — Knowlton (Electric Furnace).	
Right forward — Saunders (Masons).	
Center — Springer (Masons).	
Left guard — Older (Mullins Office).	
Right guard — Johnson (Princes).	
Second Team	
Left forward — DeCrow (Cigars).	
Right forward — Fogg (Volaws).	
Center — Flp (Radiators).	
Left guard — Sartick (Cigars).	
Right guard — Ellsworth (Masons).	

Herman, slugging first baseman, is the first member of the Brooklyn Robins to hit a training camp home run. The Babe is determined to prevent Del Bisontine, a rookie, from grabbing his job.

New Orleans, Feb. 28.—Manager Roger Peckinpaugh of the Cleveland Americans, today was all smiles, following the receipt of information that Joe Sewell, unsigned Indian shortstop, would arrive here March 3. Joe was the only remaining holdout. The tribe was slated for hard practice today. Howard Shanks, coach, and Garland "Gob" Buckeye, pitcher, are on the "hospital" list.

All-Round Athlete

Here's Jim Langan, sensational 200-pound boxer of Villanova College, Villanova, Penn., who hails from the great open spaces of Bristow, Okla. Jim's also star tackle on the football team and a star at other sports. He's scored 18 knockouts in 22 bouts. Watch this fellow!

Mrs. Pinchot Seeks Seat In Congress

Washington, Feb. 28.—Cornelia Bryce Pinchot, wife of ex-Gov. Gifford Pinchot of Pennsylvania, today announced her candidacy for congress from the 15th district, now represented by Rep. Louis T. McFadden, a seven-term veteran.

In a telegram to Frank E. Wood of Sayre, Pa., announcing her candidacy, Mrs. Pinchot indicated that a bone-dry plank will be one of the foremost parts of her platform structure.

READ THE WANT COLUMN

SALEM DRAWS BARBERTON IN OPENING GAME

Salem High will meet Barberton High at 7:50 p. m. Friday in Good-year gym in the first game for the Big Red in the opening round of the annual Northeastern Ohio Class A tournament.

The pairing is not the worst Salem could have been given, but it represents a tough encounter, nevertheless. Barberton's record is being secured by the Salem officials, and about the only thing known about the five is that it trimmed Roosevelt recently.

Roosevelt is not as good a team by a considerable margin as Kent State, but comparison in that manner may not mean anything. If Salem wins this opening game it will clash Saturday with the winner of the Cuyahoga Falls-Youngstown East game Friday night.

Salem is in the same section again with Canton McKinley, and also with Akron Central and Girard, the latter new in Class A circles. If Salem survives the two opening games it will mean one of these three. Central is the outstanding, being the runner up of the Akron city race.

Drawing of Barberton is somewhat akin to the situation last year when Ravenna was paired with the Big Red. It was a tough game and will remind fans that a team of fairly unknown ability is just as dangerous as a team from a larger city. Salem just nosed out Ravenna, 22 to 18.

ODDS STAND IN GODFREY FAVOR

Los Angeles, Feb. 28.—"I'll stop him in one round," "I'll wear him down and finish him."

Just before the big battle, George Godfrey, massive negro, and Paulino Uzcudun, the Basque from Spain, hurled the above threatening promises at each other as they prepared to crawl through the ropes at Wrigley field tonight and back up their forecasts with action. The fight is scheduled for ten rounds.

Paulino received two cablegrams today. One was from his 84-year-old mother in Regu, Spain, telling him that she is praying for the success of her son. The other was from the personal secretary of King Alfonso XIII of Spain, wishing him luck.

Betting odds today stood at 10 to 8 in favor of Godfrey. Godfrey will weigh in the neighborhood of 230 pounds, Paulino about 195.

Delaney Sticks To Strenuous Training

New York, Feb. 28.—Despite the fact that Jack Delaney is down to a razor edge for his important heavyweight engagement with Tom Heeney here next Thursday night, the Bridgeport adonis is sticking to a rather strenuous training program.

Heeney announced that he was through with boxing after sparring for four rounds yesterday at a local gymnasium, but Delaney will again work out his sparring partners today in Bridgeport.

MIXED BOWLERS WIN AND LOSE

Salem mixed Masonic bowling teams broke even in a match with two Alliance teams on the temple alleys Monday night.

No. 1 Salem team won out by 152 pins, while No. 2 team lost by 88.

FIGHT RESULTS

At Boston—Ace Hudkins, Lincoln, Neb., welterweight, won from Al Mello, Lowell, Mass., on foul in fourth round.

At New York—Eddie "Cannonball" Martin, former bantamweight champion, scored technical knock-

out over Jacques Petibon, French featherweight (3).
Frisco Bautista, of the Philippines, outpointed Mickey Sedan, Scranton, Pa., bantamweight (6).
Soldier Buckley, New York, kayeed Carlos Martinez, Chilean lightweight (2).

Tony Vaccarelli, Brooklyn, drew with Pal Silvers, New York (5).
Marcus Pole, Pittsburgh, heavyweight, outpointed Gus Berger, of Germany (5).

At Pittsburgh—Willie Harmon, New York welterweight, won decision over Cuddy De Marco, Pittsburgh (10).

At New Castle, Pa.—Frankie Rio, Cleveland weatherweight, won decision over Johnny Pollock, Youngstown, Ohio (6).

At Rochester, N. Y.—Louis "Kid" Kaplan, Meriden, Conn., lightweight, outpointed Joe Trabon, Kansas City (10).
Al Tripoli, Yonkers, N. Y., drew with Jack Willis, Rochester (10).

At Pittsfield, Mass.—Top Manollan, Boston, outpointed Sailor Darden, New York (10).

At Baltimore—Matt Adgie, Philadelphia heavyweight, scored technical knockout over Bill Mathews, Baltimore (2).
Jack Shattuck, Washington, kayeed Soldier Dewey Adams, Camp Meade.

At New Bedford, Mass.—Battling Levinsky, former light heavyweight champion, knocked out Marcel De Rose, of Italy (2).

At Philadelphia—K. O. (Phil) Kaplan, New York, stopped Abie Bain, Newark, N. J. (5).
Jack Demave, Caldwell, N. J., heavyweight, outpointed Arthur De Kuh, Brooklyn (10).

At Miami, Fla.—Young Stribling, Macon, Ga., heavyweight, kayeed Al Friedman, Boston (2).

At Trenton, N. J.—Emil Faluso, Salt Lake City flyweight, awarded newspaper decision over Johnny Brennan, Trenton (10).

At Scranton, Pa.—Ernie Jarvis,

European flyweight champion drew with Billy Kelly, of Scranton (10).
At Buffalo, N. Y.—Freddie Mueller, Buffalo, won decision over Roby Stein, Brooklyn (10).

At Chicago—Jack McCarthy, Chicago welterweight, was awarded the decision over Mo Sullivan of St. Paul (4).
Patsy Ruffo, New York junior lightweight, outpointed Joe Medill of Chicago (4).

Otto Von Porat, Norwegian heavyweight, knocked out Gordon Smith of Canada (1).
Ray Miller, Chicago lightweight, beat Tommy Crowley of Pittsburgh (4).

Lee Marriner, the University of Illinois ex-football player, won a technical knockout over Pete Truene of Scranton Pa. (4).

At Little Rock, Ark.—Mickey Gill, Dublin, Ireland, flyweight was awarded the decision over "Pinkie" George of Des Moines (10).

At Winnipeg, Man.—Al Webster of Billings, Mont., outpointed Del Fontaine of Winnipeg (10).

At Columbus, Ohio—Johnny Carpenter outpointed Dick McDonie (12).

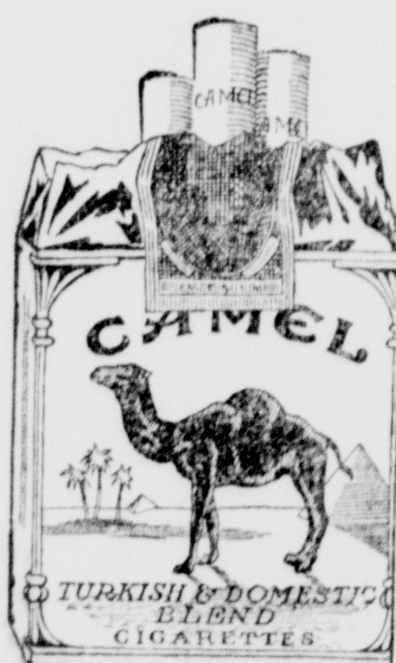

RAIL BRIDGES IN FLOOD ZONE ARE EXPENSIVE

Washington, Feb. 28.—Bridges and other works costing an estimated \$70,000,000 will be required by the railroads if the administration's program of Mississippi flood control, involving spillways, is enacted, and the affected roads feel that the government or the benefited communities should pay all this cost.

This was the message brought to the White House today by a delegation of officials of railroads operating in the flood area. Col. Albert Thom, general counsel for the American railway executives association, introduced the rail officials to President Coolidge.

Dried snakes and lizards are still popular remedies in France.

MOVIES

DOG STAR SHINES

Alexander the Great, one of the leading dog stars on the American screen, captivated audiences at the Grand last night when his full stage act was presented for the first time here. The "almost human" police dog did innumerable tricks, and delighted old as well as the numerous young folks in the house.

One of the highlights of the act is the "fight" between Alexander and his master, F. L. Davis. The scrap looks realistic, and shows how well the dog is trained to attack a man. It was this training which earned Alexander the Distinguished Service medal in the World War.

The feature picture is "The Outlawed Dog," in which Ranner, another police dog favorite, has the leading part.

Wednesday Finley's Melody band open a two-day engagement in a unit presentation program, including several acts of vaudeville.

"MOON OF ISRAEL"

"Moon of Israel," is now showing at the State. This picture, released by FBO, deals with the exodus of the Jews from Egypt, and at the same time with one of the mightiest love stories that has graced the screen.

The story is an adaptation of the novel by Sir H. Rider Haggard and is thrilling and interesting. Screened among the ruins of the mighty towers of a buried Egyptian city it brings back the passionate days of 10,000 years ago days that held happenings that are impossible to-day, but which thrill and please as no others can.

The theme deals with the love of an Egyptian prince for an Israelite slave maiden—a love that came to mean more to him than the throne which he was heir to. Maria Corda is wonderful as the slave-girl who is willing to sacrifice herself and her people to the man who has won her love.

Michael Curtiz directed the picture and produced a masterpiece that will be remembered. The cast, which is excellent, includes Arlette

Marchal, Adelqui Miller, Henry Mar, and Ferdinand Onna Ladislav Vajda, the Hungarian novelist and playwright, adapted the novel for the screen.

STYLE EDICTS

Paris, Feb. 28.—The evening wrap must be just as handsome as the gowns these days when very few women check their outer wraps. In Paris, where one can never be certain of the heat, there is a real method in their madness. Then too, evening ensembles call for a wrap matching the frock and even completing it in charming fashion.

Velvet seems to be the favorite material for the evening cloak at the present moment, although lame and other broad-based silks are still much used. Velvet is also used for lining even when the outside is of the same material.

Paul Poiret makes his evening wraps almost Oriental in their splendor. One comes on gorgeous velvet which shades from light red at the neck through various tones of gray and black at the hem, and is elaborately embroidered in different colors with here and there bits of mother-of-pearl and tiny gold sequins. The collar and cuffs of white ostrich have sparkling clusters of rhinestones and are lined with soft cadet-blue velvet.

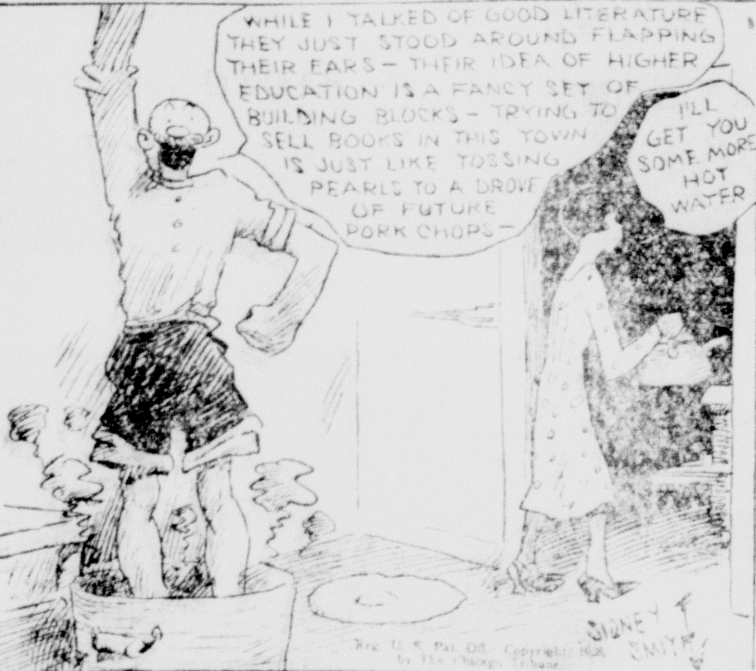

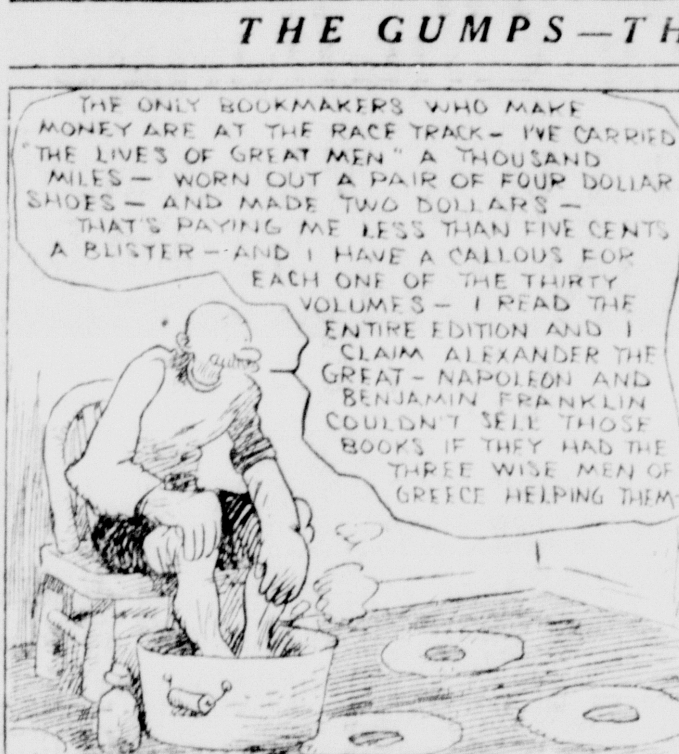

Still another line of crimson lined with silver lame. It is cut with a semi-fitted back and long pointed angel sleeves, shirred along the inside and lined with lame. A jade-green velvet has loops of crystal beads hanging from the back of the sleeves, is lined with black velvet and has a black fur collar.

Bechoff is making an original circular cape for evening wear in black velvet with fine vertical tuckings extending from the neck and well below the waistline where they end in a V-shape with a cord and long silk tassel hanging from the back of the neck.

Roller Bearings On Passenger Coaches

Denver, Feb. 28.—Railroad officials and mechanical engineers are watching with interest experiments being made with roller bearings for railroad passenger cars, according to J. M. Tausig of St. Louis, president of the Washburn railroad in an interview here recently while enroute from the Pacific coast to his Missouri headquarters.

"Roller bearings will probably be the next great improvement in railroad passenger equipment," Tausig said, "and they may eventually be used on freight cars."

THE HOME KITCHEN

By Jeannette Young Norton

One of our most difficult tasks has been to pick out from among six recipes extant the Martha Washington pie. We are convinced it was a luscious filling between two crusts the kind that melted in your mouth, and had not even a speaking acquaintance with the cream-and-egg affair that poses in the bakeries as the one and only Martha Washington pie.

The kitchen was famous for boiled young turkey with oyster dressing, buttered lobster, spit-roasted beef, Virginia baked ham, broiled Potomac shad, terrapin steak, broiled bluet, cheese pies, jellied tongue, Charlotte Russe, velvet cream and other Southern dainties. We can well imagine the rich birthday cake stirred for the "master," with its glistening frosting and lettered by the mistress aided by a cornucopia made of "stiff writing paper."

Cold suppers were fashionable in those days—the elaborate foods of yore and garnished in almost unbelievable fashion, only the coffee, tea or chocolate being hot. Home-made wines, beers and shrubs were, of course, chilled. A few of the old-fashioned birthday specialty recipes may be of interest to the modern housewife.

Washington Pie

Line a pie plate with rich short pie crust. Beat three egg yolks with three-quarters of a cupful of sugar; add a teaspoonful of melted butter, a half teaspoonful of salt, a grating of nutmeg and four grated tart apples. Bake in the crust and when done cover with a meringue made of the stiffly beaten whites of the egg to which two tablespoonfuls of powdered sugar and a half teaspoonful of vanilla has been added. Set in the oven long enough to cook and brown the meringue. Serve hot or cold.

Birthday Cake

Beat one pound of butter and one pound of sugar to a cream; then add slowly the beaten yolks of eight eggs, stiff in one pound of pastry flour, two teaspoonfuls of baking powder and a half teaspoonful of salt. Beat well then stir in a cupful of light cream or rich milk. Now fold in the stiffly beaten whites of eggs and a teaspoonful of vanilla. Bake in a large, round, well-buttered pan. When baked ice with white icing, boiled or uncooked, and decorate with a pastry tube.

Peach Colder

Line a deep square pan with light flaky pie crust. Pare, halve and stone ripe peaches enough to fill the crust, sprinkling each layer with plenty of sugar. Sprinkle with a tablespoonful of butter. When blended add the juice of half a lemon and put over the peaches. When the crust is done and the peaches soft, remove from the oven. Serve hot with Rocky Mountain sauce or cold with whipped cream, delicately sweetened and flavored. The colder is frequently made of plums, quinces, large cherries, or large strawberries.

Syllabub

Cover the bottom of a glass dish with split lady fingers, or sponge cakes, and cover lightly with rich preserves or fruit jam. Whip a quart of cream very stiff, adding gradually the stiffly beaten whites of four eggs, beaten with a small cupful of powdered sugar. Add a wingful of home-made wine. Chill, then pour over the fruit arranged in the glass dish. Decorate with a little chopped citron and candied cherries.

WEIGH WHAT YOU DESIRE

If you over-weigh, the cause may not lie in over-eating or under-exercise. It may lie in a fault in nutrition which modern research has discovered. And which science now corrects.

The method is embodied in Marmola prescription tablets. People have used them for 20 years—millions of boxes of them. And many of the people you envy—with slender figures, new vivacity and health—will urge you to adopt this way.

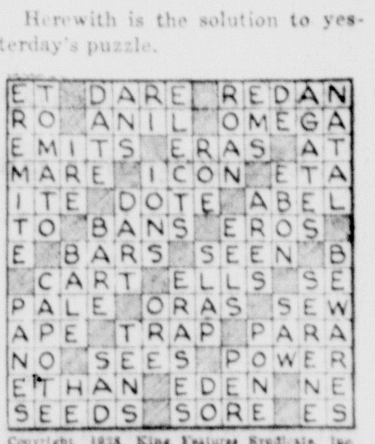

The use of Marmola does not require abnormal exercise or diet. In every box you will find the formula and also the reasons for results. You will know just why your weight comes down and why every effort is helpful. Learn the facts, and do it now. Do so by asking your drug-gist today for a \$1 box of Marmola.

12.—Myself.
14.—What colony (abbr.) was founded by Roger Williams?
20.—Printer's measure.

21.—Discerned.
22.—Footlike organ.
23.—Any open space.

25.—New England State (abbr.).
27.—Shakespearean form of "show."
28.—Brought legal action against.

31.—Who is the Norse god of war and thunder?
32.—Cause to sit.
35.—Cradle.

37.—What ancient city is connected with Sargon?
39.—Purse.
41.—Who is the Greek god of love?

42.—What Phrygian king had the golden touch?
43.—Climbing plant of a tropical forest.
44.—Of what Oriental country is Delhi the capital?

46.—Who was the great Mogul emperor of Hindustan?
47.—Net.
49.—Conspire.

50.—French river.
53.—Biblical character.
54.—Jaded horse.

57.—Mountain (abbr.).
59.—Two (Roman numerals).

Here-with is the solution to yesterday's puzzle.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Pettishness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning; it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

FEBRUARY Is Pruning Time

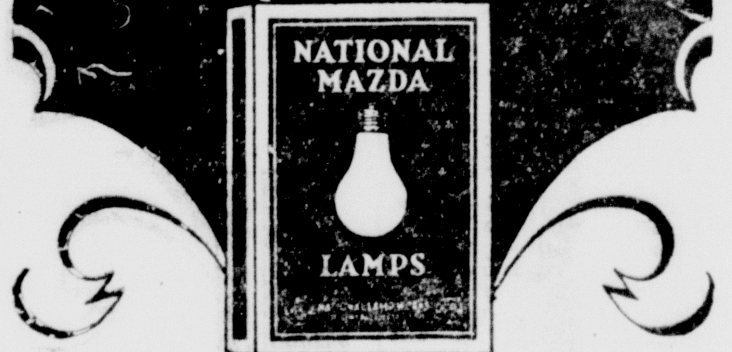

Pruning Trees, Bushes, and Vines Make Them Look Better, Live Longer and Produce More Fruit.

Prune out the dead and useless branches and shoots now. It is one of the things necessary to insure good, healthy crops. With the right equipment, this disagreeable task is much easier. Short and long handled styles with sharp, strong, cutting blades. Make a clean cut. Will not bruise or injure the tender twig.

It's a Paying Proposition—Do It Now!

FOUR LANGUAGES MAKE ONE QUARTET

Having different mother tongues does not hamper the members of the Inter-racial quartet of the Schaeffer Missionary Training School from singing together in English and in working in perfect accord with the soloist who speaks still another language. The quartet consists of, left to right: Stoyanka Nicholoff, a Bulgarian; Bonzema Hoffmann, a Czechoslovakian; Bessie Wong, a Chinese-American and inset is of Dorothy Scott, an Afro-American.

BONNETS FOR EASTER ARE MADE OF FELT

Paris, Feb. 28. — Easter bonnets this year will undoubtedly be made of felt, for these small, tight-fitting little felt hats seem here to stay.

Time and again the fashionable modistes have tried to replace them by fancy headwear of other materials, but the women always cry for simple felt designs. Never in the history of the millinery business has a material and design taken the way the present mode has.

Straws are being pushed forward and there are some attractive straw and felt combinations with brightly-colored geometric ornaments and scarves to match. One from Lewis has a brim lined with rose manilla straw with a cut on the side front and a small felt bow in the back. An almond-green felt has half of the brim covered with straw and a ribbon finishes off the crown with a pink flower.

A bois de rose toque in fancy silk straw has four wings covered with braiding and a smart red amaranth felt comes in a beret shape with a round crown and three bands of felt to form the movement on top and the close-fitting line around the face. It is pulled over to the back with a coral bun.

Several ribbon models are proving popular. One is made up in beige gros grain ribbon, fitting close to the face with two tiers of black gros grain building up the hat. It is draped to one side and fastened with a small pearl ornament. Another in beige, brown and black gros grain has a black silk pompon on the side. Straws most in demand for summer wear are Bangkok Bengal and Bakon, the

exotic straws and the favorite colors are red, green, navy and black. They have wider brims and the crowns appear to be deeper and in many instances have fancy frills and ornaments in keeping with the movement toward femininity.

OUR READERS MARINES IN NICARAGUA

Editor Salem News: After reading the following I was impressed with the thought that it gave very good reasons why we should keep the marines out of Nicaragua. It is very difficult to play the part of mediator in a family quarrel and keep the confidence of both factions.

American marines are in Nicaragua to supervise an election. When the country was pacified last spring, through Col. Stimson's negotiations with leaders of the Conservative and Liberal parties, the Liberals were persuaded to cease fighting against the Conservative president Diaz, on condition that the United States supervise the presidential elections this year, thus giving the Liberals an opportunity to achieve by elections the power they had almost won by civil war.

The rights of the Liberal leaders, Sacasa, and of the Conservative, Diaz, to the presidency, were both open to question. The government of the United States had recognized Diaz. Events showed that, without assistance from the United States, Diaz was not able to keep control. The sentiment of the country apparently was represented by the superior strength of the Liberal forces in the field.

It is unfortunately true that in Nicaragua, as in some other countries, the party in power has a great advantage at the elections. They can control patronage in such a way that elections tend to favor the ruling party. The Liberals accepted the Stimson agreement because they felt confident that should a fair election be held, they would win. Events seem to prove that they were right. The trend of opinion is so manifestly hostile to the Diaz government that a curious reaction has occurred. The party which owes to the United States its control of the government is now bitterly hostile to the United States, and is delaying the passage of the electoral law prepared to provide for American supervision of the approaching elections. American supervision of the elections seems to assure Conservative defeat.

It seems likely, the Conservatives are defeated at the polls, their leaders can point to American intervention in the elections as the reason of their defeat, wait until some act of the government in power has aroused dissatisfaction and precipitate another revolution. The Conservative hostility to the United States now, while they are being maintained in power by our arms, suggests what their attitude will be if they lose control as a result of our interference.

There are patriotic Nicaraguans who understand the importance of developing a stable, just government. Their efforts are nullified by intervention. It seems almost impossible for a people to be taught self-government, they have to learn it. Had any orderly government of Europe had time to interfere in England during the Wars of the Roses, good order would have been restored more quickly, but democracy would

Under New Flag

Pauline Garon, motion picture player and wife of Lowell Sherman, forswears allegiance to the British flag and becomes a full-fledged American citizenette in New York.

Pertussin
clears the throat
safe for every cough

probably never have been developed successfully.

The United States needs just and orderly governments in Latin-America for the sake of our business and for the protection of the Panama Canal. Experience seems to show that we cannot get orderly just governments by setting them up with the aid of American marines. The natural instinct of patriotism makes a normal man distrust a government imposed upon him by foreign military force. This distrust provides the material for more revolutions, more disorder, less business.

Japs Ban Film Of O'Neil Drama; Say Love Scenes "Bad"

Tokyo, Feb. 28. — Plays portraying illicit love are injurious to the morals of Japan, if not to New York, so the Tokyo police have forbidden the production here of "Desire Under the Elms," Eugene O'Neil's drama of New England farm life. The play was to have been presented here by the New Drama association, an organization of Japanese interested in the modern stage.

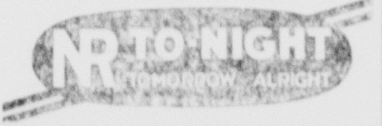

Japanese actors had been selected to impersonate the horny-handed, nasal-tongued Yankees and rehearsals had been in progress for several weeks when the police, after reading the script submitted by the producers, put down the ban.

MINTS PLAN TO MAKE SMALLER SILVER DOLLAR

Denver, Feb. 28. — Following announcement that new money in smaller sized currency would be available for distribution by the treasury department, probably late this year, a movement is under way here for adoption of a silver dollar considerably smaller in size than the present familiar "cartwheel."

An increase in the mining industry of Colorado is seen in the proposal, offered by Coloradans for the new scientific silver dollar, is adopted by the federal government. The new coin according to present discussion, would be composed of one ounce of silver, 47 cents worth of gold and three cents worth of silver, mostly copper. Such a composition is pointed out as being a fair, equitable representation of the value of the country's wealth which is based on gold and silver.

Size An Advantage
Another advantage of the new dollar, as contemplated under the proposal, would be its size, for it would be slightly larger than the 36-cent piece and of a thickness 20 per cent less than the half dollar. Were such a piece adopted, Colorado being one of the largest producers of silver in the land would naturally benefit in a proposition whose features would offer advantages to everybody. Manufacture of the coin would necessitate an increased production of silver and this would stimulate mining, put more money into circulation and cause a greater prosperity, the proponents declare.

Discussion of the proposal brought out the cumbersome of the present "iron man," the disadvantage of whose weight has caused the eastern section of the country to shun it and substitute the dollar bill.

See Few Dollars
It is seldom that a silver dollar is seen east of the Mississippi river but the bills are omnipresent and their repositories are not always the cleanest or most sanitary, leading various banks to establish bill laundries for their cleansing. In consequence, the Coloradans interested in the proposal point out that the bill is one of the world's greatest mediums for the distribution of diseases, and contrast it with their suggested new coin which would be sanitary because it would not gather filth.

"Individual Initiative Is Responsible For America's Growth"
says Andrew W. Mellon
Secretary of the U. S. Treasury
"It is private initiative which is chiefly responsible for America's rapid growth in wealth. Whether we shall continue to grow and expand depends upon whether we pursue an intelligent and constructive or a hostile and destructive policy toward those forces which have brought about our present development."

Fifty years ago there was no electric light and power in America. Modern household conveniences, modern labor-saving and safety devices were then unknown. Labor worked from twelve to sixteen hours at wages averaging less than one dollar a day.
Large scale production at low cost and the high earning capacity of workers are the basic factors in America's present high standard of living. But only through the electrification of industry have these factors become so effective. Without electric light and automatically controlled motor power and electric heat, the industrial miracles of today would be impossible.
Back of the electrification of American industry is the impulse which has made all America great. Individual initiative left free to work and plan, and reap a just reward for its enterprise, has invented, perfected and produced our electric tools of home and industry.
There has never been any granting of special privilege, no exploitation in the natural growth of the electric light and power companies. Engaged in providing a public service which has played a vital role in the progress of American prosperity, individual initiative alone has been and must always be the moving force back of our electrical development.
